Fax: (401) 254-0157

New Assistant "RGP Straddle" Stool.

RGP's new Straddle stool provides optimal seating allowing for proper positioning of the spine and the pelvis. The stool pre-positions you into an anterior-pelvic-tilt similar to sitting on a saddle. The angle of seat allows for proper balance of core muscles and maintenance of normal curvature 'Lordosis' without the use of a backrest. The Straddle seat provides forward tilt allowing you to work 'flexed' without placing stress on the spine. Adaptation of the assistant arm allows the optimal ergonomic seating benefits for the assistant.

RGP Inc. manufactures the Swedish Seating System used by medical and dental professionals world-wide. Visit RGP's web site at <http://www.rgpErgo.com>, or call 1-800-522-9695, or e-mail: sales@rgpErgo.com
